EVA CUSTOM ORTHOTICS

After years of material and product research, we have divided our custom EVA foot orthotic line in 4 types that cover all your needs. For every activity and requirement there is a suitable insole model, made out of a specific EVA material. All of our custom foot orthoses are made of durable EVA materials so your insoles last longer. The insoles can be further customized by a wide range of top covers.

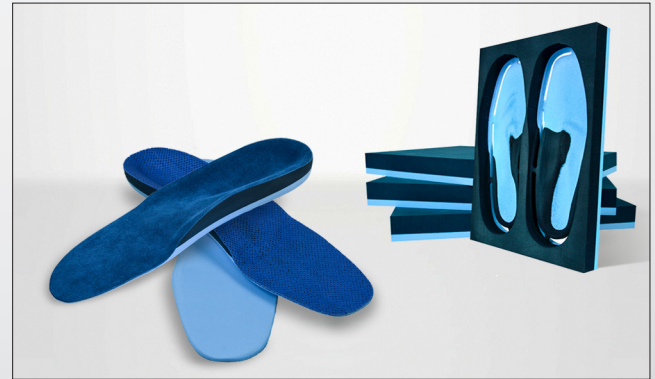

CARE

The CARE custom EVA foot orthoses are designed to give extra comfort and relieve foot complaints. If you need to make an insole that offloads foot pressure and pressure peaks, in combination with extra cushioning for specific pathological conditions (e.g. diabetic foot), this is your orthotic type.

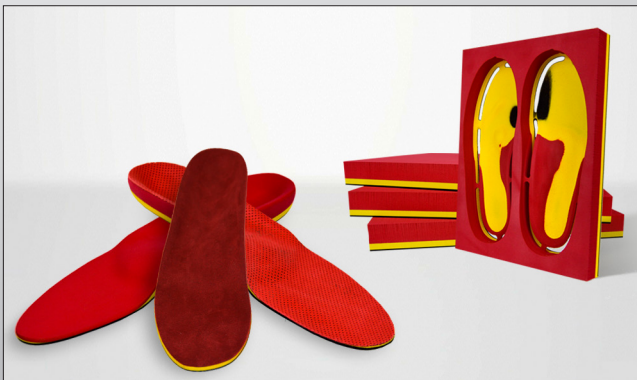

COMFORT

The COMFORT custom EVA foot orthoses take the energy generated from your hips and legs and disperses it forward producing maximum efficiency and performance. This COMFORT type is the most used custom foot orthotic; a real all-round treatment solution.

SPORT

The SPORT custom EVA foot orthoses are our high-end sport orthotics line. It is designed to work with shoes where total control is the goal. Using a denser EVA combination; this allows the orthotics to transfer the power output rather than absorbing it.

DRESSED

The DRESSED custom EVA foot orthoses to wear every day in your dressed shoes where there is not enough space to put a full length insole. When standing on your feet all day, in dressed shoes or even boots, these custom orthotics help to relieve that common feeling of strain and restlessness.
